

ORIENTATION PROGRAMME

19TH July 2022

On 19th July, 2022, EMPRESARIO hosted ice-breaking session with BATCH 28 and BA-01. The session turned out to be a bit informal then others. Students were made part of various games and interacting activities by our host Mr. Vikash Ranjan and Miss Santhwana Prasad. The Club witnessed higher zest amongst the freshers who evinced a lot of interest on entrepreneurship and startups with a strong desire to initiate and execute their own ideas. A very important agenda of this program was to inaugurate night canteen, especially in the girls' hostel that will be operated by the club members only. The canteen will handle packed items popular among the students which will be delivered instantly within limited operational time frame after the gates are closed. All the items to be sold would consist of dry snacks only abiding by the institution's guidelines. It was heartening to listen to our new faculty coordinator Prof. (Dr.) Santosh Kumar Pattanayak for the first time who shared in brief the future plans and activities for the Club during the year including reactivation of XIME Incubation Centre. Thereafter, it was followed by an intro session with the existing core members and office bearers of the Club. We all are enthused with the encouraging response from the new batch during the course of the event and looking forward to their whole-hearted and active participation in our club activities.
